Wisconsin's Forest Resources: FIA and TPO

Council on Forestry Eau Claire, March 2024

Ryan Heiderman, Forest Inventory Analyst

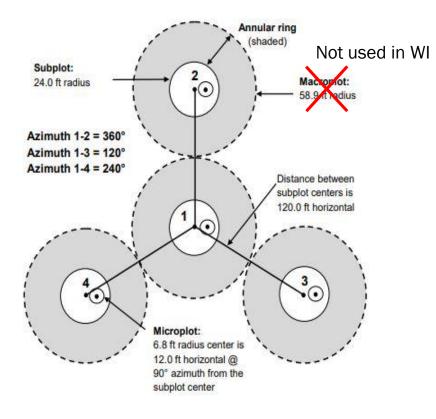

FIA: Forest Inventory and Analysis

- National-scale forest inventory
- Congressionally mandated program
- USFS administered, input/customization by states/regions
- Network of permanent, field measured plots across all forested land in the U.S.

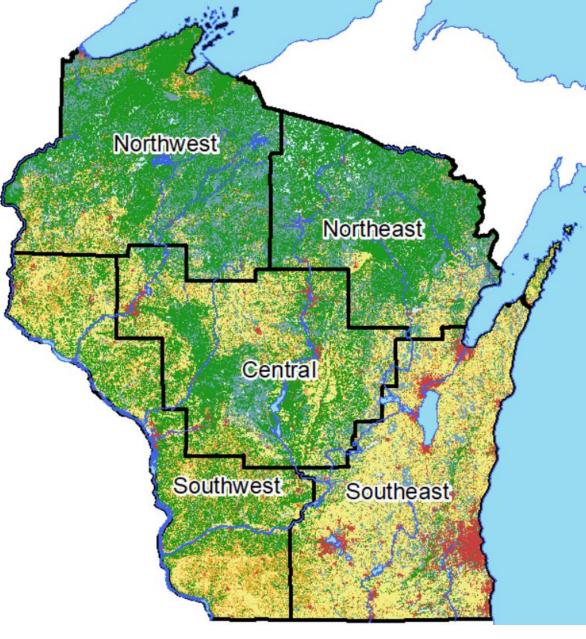

FIA in Wisconsin

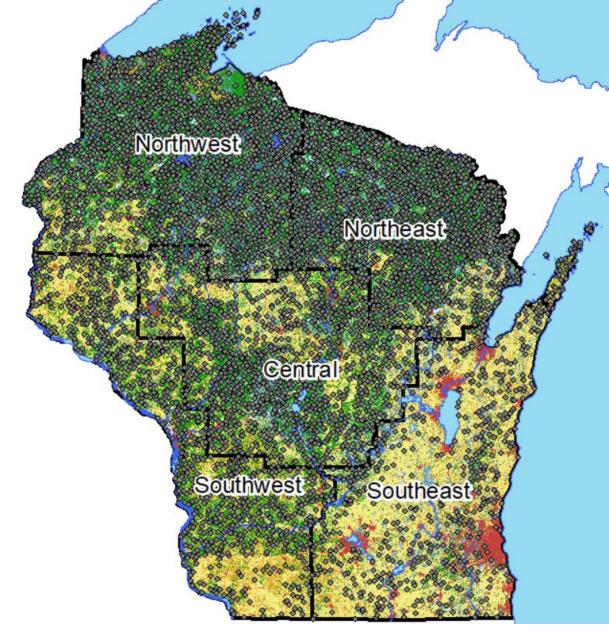

- Forest land only:
 - at least 10 percent canopy cover of trees (or capable of)
 - at least 1 acre in size and 120 feet wide
- Currently on 7-year cycle
- Double intensity
- 6,336 plots in 'accessible forest conditions'
- Field work: Half USFS/Half Contractor

WISCLAND2.0

٠

Timberland: Quick County Look

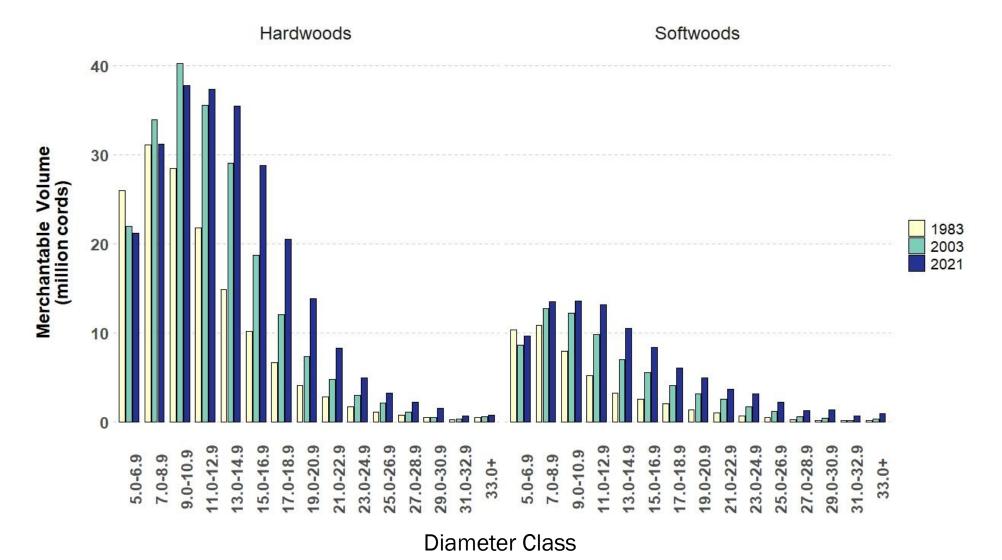

Florence, Iron, Forest, Bayfield are ~80%+ forested

Wisconsin's forests are aging

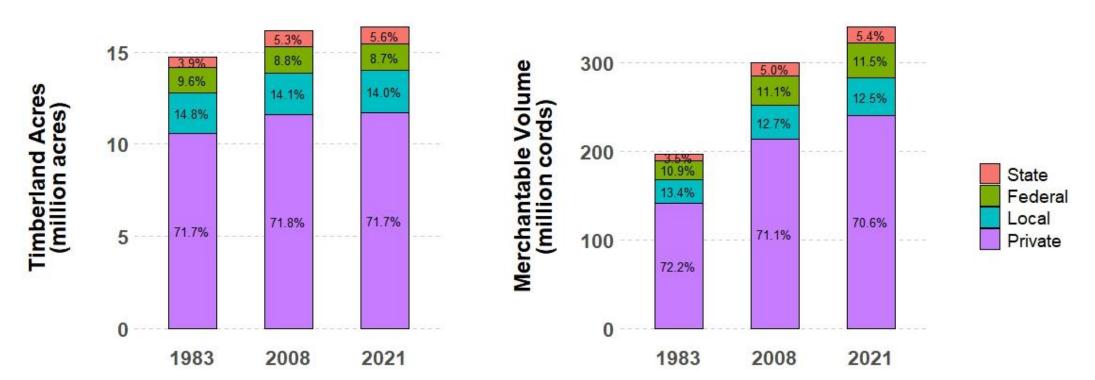

- Older forests usually means larger trees
- Is this a good thing? For marketability? Long-term health of forests?
- Impact on regeneration and future forests

State Selection Factsheet Backpage

Forest Inventory & Analysis One-Click TPO Factsheet

The USDA Forest Service Forest Inventory & Analysis program supplies annual updates that provide a brief overview of forest resources in each states based on an inventory conducted by the FIA program in cooperation with each State forestry agency.

Pick a state of interest and the factsheet will be generated for you. Use the back button to navigate back to the map to choose another state. Use the download button to obtain you own copy of the factsheet that interests you.

Timber Product Output and Use for Wisconsin, 2018

Wisconsin forests accounted for a total of 332,927 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 316,258 MCF within the State.

This resource update contains the findings of a survey conducted on a sample o all primary wood-using mills in Wisconsin. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was onducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw log veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were no surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page)
